

My name is Kevin Benton. I am originally from Wilson County, North Carolina. I am a freshman at Elizabeth City State University (ECSU) in Elizabeth City, North Carolina. I am majoring in Computer Science with a concentration in Science.

Throughout my time in school I always had an interest in computer science. Until my junior year of high school that my involvement in computers increased.

At ECSU I am accepted in the Center of Excellence in Remote Sensing Education and Research (CERSER) program. This program gives me in depth training in various software programs and programming languages during the fall semester such as Dreamweaver, Photoshop, C++, and Python. This will be followed by a research project in the spring, to put these skills to use.

My plan for success includes keeping a high GPA and seeking out research opportunities to obtain hands on use of my education. My goal is to graduate in the summer of 2017 and receive my Bachelor's degree in Computer Science with a concentration in Science. Once I obtain my degree, I plan on pursuing my Master's Degree in Computer Science. My career goal is to become a computer engineer.
